

Food Transfer & Washdown Hose!

Plan for prevention not just replacement!

Understanding Microban® Antimicrobial Technology!

Microban® is an antimicrobial material additive that inhibits bacteria from building up on the external surface of hose!
Plan smart! Make it part of your operational requirement!

Hose gets dragged in the “Splash Zone”!

Prevention is the best approach to safety.....always!

*Microban is a trademark of Microban Product Company™

Low Pressure Washdown

Plan for prevention not just replacement!

Simple Guide to Selecting a Low Pressure Washdown Hose

Selecting the proper hose is not just a purchasing decision. Fluid Hose encourages purchasing, operations and Health & Safety teams to collaborate on a proper washdown plan that inhibits germs & bacteria!

Product	Sizes (inch)	Hose Colour	Non-Marking	Oil Resistant Tube & Cover	Super Abrasion Cover	Microban® Antimicrobial Cover	FDA	Working Pressure (PSI)
Blue Fortress 300	1/2 to 1	Blue	Yes	Yes	Yes	Yes	Yes	300
Fortress 300	1/2 to 1	Yellow	Yes	Yes	Yes	Yes		300
Fortress 300 White	1/2 to 1"	White	Yes	Yes	Yes			300
Sani-Wash 300	1/2 to 1	White	Yes					300
Sani-Wash Supreme 300	3/4	White	Yes			Yes	Yes	300
Super Sani-Wash 300	1/2 to 1"	White	Yes			Yes		300

Bacteria Awareness

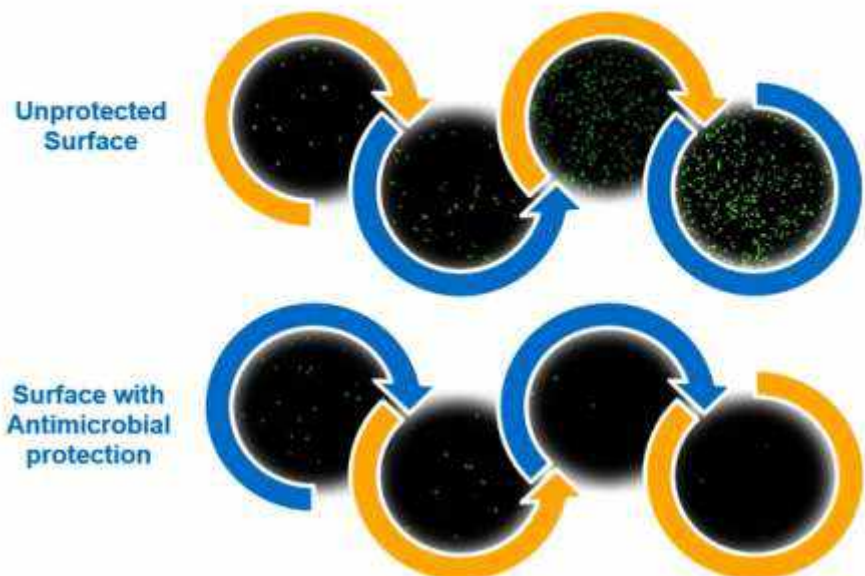

Bacteria can “attach” to porous surfaces like hose covers.

Hoses get dragged across the floor then across equipment during the cleaning process. The floor can be a major source of bacteria gathering from shoes, still water, etc.

Antimicrobial designed surfaces inhibit bacteria build up. This helps us all by.....

- Allowing bacteria to be washed off hose covers with less effort
- Reducing the quantity of bacteria to “attach” to a hose

Educate your teams. Make smart choices!

Low Pressure Washdown

Plan for prevention not just replacement!

Available

Nozzles and Swivel Connectors

Non-Marking	Oil Res Tube & Cover	Abrasion Cover	Microban® Antimicrobial	FDA	Pressure (PSI)	Max Temp Rating (F/C)

High Pressure Cleaning

Plan for prevention not just replacement!

Simple Guide to Selecting a High Pressure Cleaning Hose

High pressure water splashes further. Fluid Hose encourages purchasing, operations and Health & Safety to collaborate on a proper washdown plan to fit the application and the long term budget.

Product	Sizes (inch)	Hose Colour	Non-Marking	Oil Resistant Tube & Cover	Abrasion Cover	Microban® Antimicrobial Cover	Working Pressure (PSI)
AquaPower 4000	1/4 to 1/2	Blue, Gray, Yellow, Black	Not Black	Yes	Yes		4000
AquaPower 6000	3/8	Black, Gray	Not Black	Yes	Yes		6000
AquaPower HT 4000 (Hi-Temp)	3/8	Black		Yes	Yes		4000
Fortress 3000	1/4 to 1/2	Yellow	Yes	Yes	Yes	Yes	3000

High Pressure Awareness

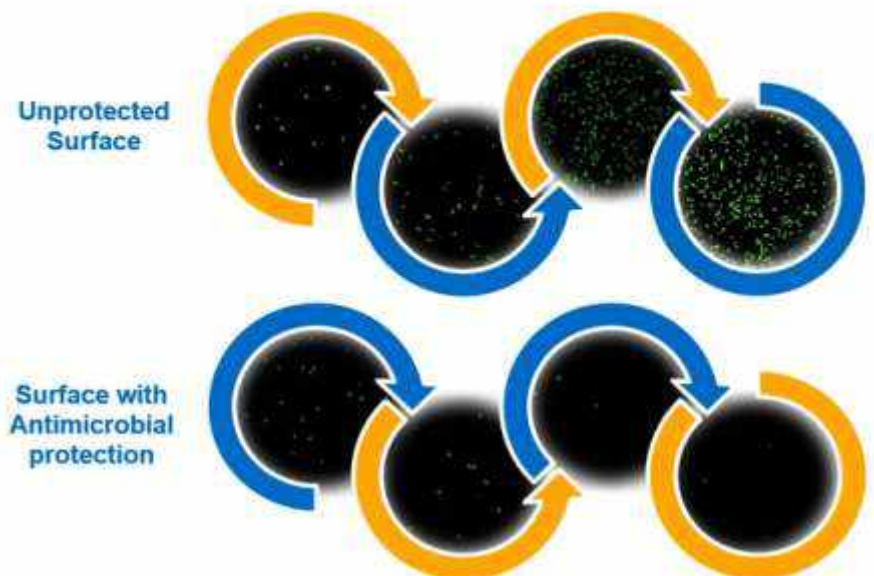

High pressure cleaning equipment can be found in construction, residential, institutional and food and beverage processing, etc.

Sanitary Applications

- Hose covers can have germs and bacteria attach to them. Microban is a smart choice for such applications.
- The “Splash Zone” isn’t always around the food & beverage process reducing the need for an antimicrobial cover.

Non Sanitary Applications

- Buy smart! Buy Quality!
- Avoid spending additional man hours on fixing or replacing what you saved 10% on procuring. Work smarter not harder.

High Pressure Cleaning

Plan for prevention not just replacement!

Plan Your Operations Accordingly

Considerations to make.....

- Food & Beverage area?
- Hot Water Requirement?
- Color coding?
- Repeat supply available?
- Reputable supply partner?

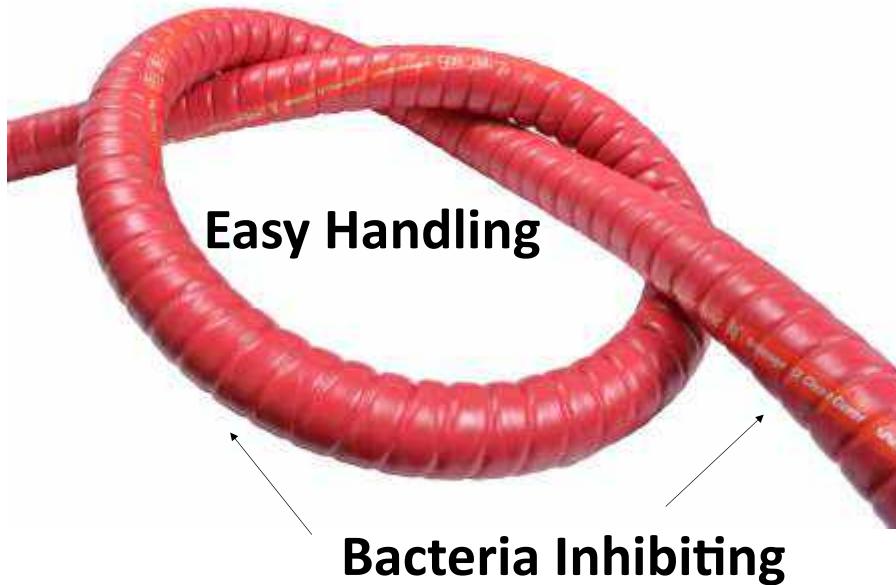

Hose Colour	Non-Marking	Oil Resistant Cover	Abrasion Cover	Microban® Antimicrobia I Cover	Working Pressure (PSI)	Max Temp Rating (F/C)
AquaPower 4000						
Blue, Gray, Yellow, Black	Yes (Not Black)	Yes	Yes		4000	210 / 99
AquaPower 6000						
Black, Gray	Yes (Not Black)	Yes	Yes		6000	250 / 125
AquaPower HT 4000						
Black		Yes	Yes		4000	210 / 99
Fortress 3000						
Yellow	Yes	Yes	Yes	Yes	3000	210 / 99
SR7 (Synflex Thermoplastic)						
Black	Yes	Yes	Yes		2000-3000	212 / 100

Food & Beverage Transfer

Plan for handling and efficiency!

Simple Guide to Selecting a Food Transfer Hose

Larger bore hoses can be difficult to handle and need to be sanitary. Continental has all of these considerations covered!

Ergonomic Awareness

Continental Extremerflex hoses makes hose manipulation easy. Never before has there been a hose so responsive to handle.....

- Tight routing—tank farms
- Easy glide covers
- Easy wash covers
- Color options

Sanitary Awareness

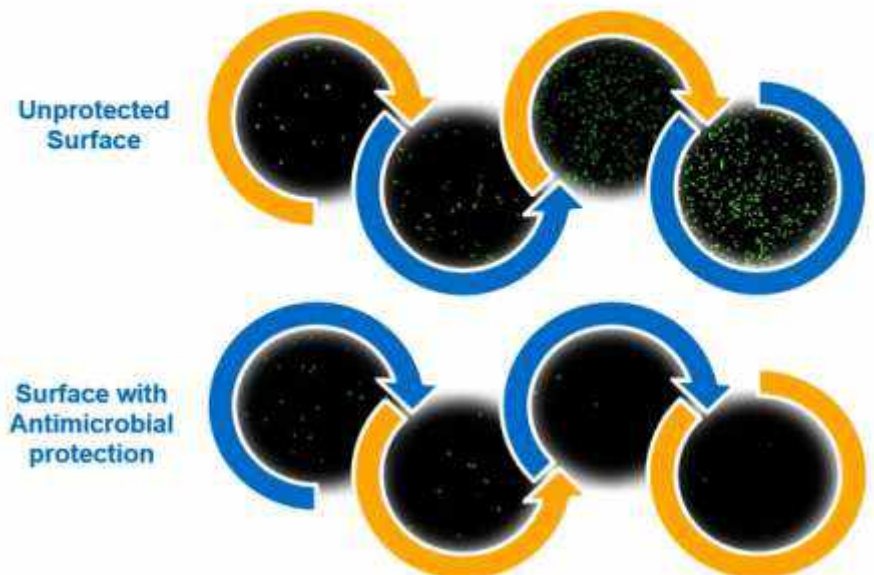

Bacteria can “attach” to porous surfaces like hose covers.

Hoses get dragged across the floor then across equipment during the cleaning process. The floor can be a major source of bacteria gathering from shoes, still water, etc.

Antimicrobial designed surfaces inhibit bacteria build up. This helps us all by.....

- Allowing bacteria to be washed off hose covers with less effort
- Reducing the quantity of bacteria to “attach” to a hose

Educate your teams. Make smart choices!
